PROFILE

Enthusiastic about Artificial Intelligence, Computer Vision and Generative AI. Skilled in Python, OpenCV, NLP, and embedded systems, with hands-on experience building real-time AI and automation projects involving YOLOv8, semantic similarity systems, and IoT-based workflows. Passionate about developing practical intelligent systems that combine machine learning, computer vision, and real-world problem solving.

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech ECE	DSEU	7.89 (Current)	2024-Present
Senior Secondary	Jamia Millia Islamia	76.%	2022
Secondary	Jamia Millia Islamia	84%	2020

PROJECTS

- **AI Gas Stove Safety System** April 2026
Github
OpenCV, YOLOv8, Ultralytics, NumPy
 - Real-Time Object Detection, Computer Vision, HSV Colour Segmentation
 - Implemented rule-based AI logic to identify unattended gas stove situations, enabling automated hazard monitoring in real time
 - Designed lightweight detection pipelines capable of maintaining real-time inference performance (>10 FPS) on standard hardware
 - Improved flame detection reliability by extending HSV-based detection for blue gas stove flames and reducing false negatives
 - Built modular alert and visualization workflows to support scalable future integration with IoT devices and notification systems
- **AI Resume Intelligence System** December 2025
Github
Streamlit, scikit-learn, Sentence Transformers, Pandas, NLTK, spaCy
 - TF-IDF, BERT Embeddings, Semantic Similarity, NLP Preprocessing, Cosine Similarity
 - Built preprocessing pipelines including tokenization, lemmatization, and text normalization, improving matching consistency across varied resume formats
 - Implemented cosine similarity-based ranking workflows that reduced manual resume screening effort by an estimated 60–70%
 - Designed an explainable matching workflow to identify matched and missing skills from job descriptions
 - Designed explainable AI analysis for matched and missing skills, enabling faster candidate evaluation and improved hiring insights
 - Optimized modular NLP workflows for scalable semantic search and real-time similarity analysis

SKILLS

- **Programming:** Python
- **AI / Machine Learning:** Deep Learning, Computer Vision, NLP, Neural Networks, Transformers, flask
- **Frameworks and Libraries:** Pytorch, scikit-learn, Pandas, NumPy, NLTK, spaCy, ipykernel, matplotlib, seaborn
- **CV / AI tools:** OpenCV, YOLOv8, Ultralytics, Sentence Transformers
- **Developer tools:** Git, GitHub, VS Code, MATLAB
- **Non Technical:** Latex, Music Production, Problem Solving, Team Collaboration, Rapid Prototyping

KEY COURSES TAKEN

- **Deep Learning:**
IIT Ropar, NPTEL, Silver medal
- **Introduction to Large Language Models:**
IIT Delhi, NPTEL
- **Data Science, Machine Learning, DL, NLP Bootcamp:**
Udemy, Krish Naik

POSITIONS OF RESPONSIBILITY

- **PR core member, GDGC, DSEU** August 2024 - present
 - Reached over 1.5 Million views on a reel through creative writing and trendy reel ideas.
